- **Natural Insect Repellent**
- **Natural Fungus and Disease Control**
- **Chemical Free**
- **Easy to Apply**
- **Odorless in Minutes**

NC416 Qt. RTS 8-13958-02416-1

Nature's Creation® **GarlicCide Insect Repellent and Fungicide** is packaged in a Ready to Spray bottle that attaches to the hose and automatically mixes the proper proportions of spray and water. For thousands of years, garlic has been used for everything from seasoning to medication. It contains allicin, a sulfur compound responsible for its anti-fungal, anti-bacterial properties and health benefits. Insects cannot tolerate garlic. It seems to control them by blocking their olfactory senses, making it difficult to find their prey. Aphids, mosquitoes and most other insects are repelled by garlic.

Garlic is an all natural fungicide that fights diseases in the soil such as Brown Patch, Take All Patch, Gray Spot in St. Augustine Grass and Damping Off in seedlings. **Nature's Creation® GarlicCide Insect Repellent and Fungicide** also controls several disease pathogens including Rhizoctonia, Pythium, Fusarium, Phytophthora and others. Safe to use on all turf-grasses and plants.
