

Natural

- Poultry Based Formula
- Slow Release Nitrogen
- Four Strains of Mycorrhizal Fungi
- No Bio-Solids - Will Not Burn
- Great for Lawns, Gardens, Annuals, Perennials, Trees, Shrubs, Roses
- Uniform Easy to Spread Prills
- Kid and Pet Friendly

NC151 40 Lb. 8-13958-02151-1

Nature's Creation® Turf Food with Mycorrhizal Fungi 4-2-2 is composed of clean, uniform, easy to spread prills made to the highest standards for a virtually dust-free application. We combine our highly nutritious fertilizer with the four most important strains of **Mycorrhizal Fungi**.

Nature's Creation® Turf Food with Mycorrhizal Fungi 4-2-2 is a product based on the latest research into the beneficial relationship between plants and certain fungi. Mycorrhiza is the word used by scientists to describe the relationship between a fungi and the roots of a plant. In fact, the term mycorrhiza literally means fungus root. Our fertilizer contains members of the genus *Glomus*. They are arbuscular mycorrhizal fungi. This group of fungi multiply and form a symbiotic relationship with the roots of the host plant. They provide benefits to the host plants including, increased nutrient uptake, drought tolerance and disease resistance.

Our 4-2-2 is fortified with the four of the most effective strains of **Mycorrhizal fungi**.

Contains:

75 Total Mycorrhizal Fungi Propagules Per Lb.
Glomus Aggregatum 0.04 Propagules/Gram
Glomus Mosseae 0.04 Propagules/Gram
Glomus Etunicatum 0.04 Propagules/Gram
Glomus Intraradices 0.04 Propagules/Gram

In addition to the Mycorrhizae we have added Iron, Calcium and Humates. The 5% Humate in each bag adds beneficial organic matter including Fulvic, Humic, and Ulmic acids as well as Lignin.

Nature's Creation® Turf Food with Mycorrhizal Fungi 4-2-2 is kid and pet friendly and will not burn.
